EDUCATION

Sri Krishna College of Engineering and Technology
Bachelor of Technology in Information Technology, CGPA: 8.5/10

St. Thomas Matriculation Higher Secondary School
Higher Secondary Certificate, 91.3%

Coimbatore, India
Expected May 2027

Tuticorin, India
Graduated 2023

SUMMARY

Software engineering intern at Amazon with hands-on experience building production systems for 1000+ users. Specialized in AI/ML, full-stack development, and cloud technologies. Delivered 6+ applications impacting 2000+ users with 15-40% performance improvements. Solved 200+ algorithms problems. Seeking Infosys InStep 2026 opportunity to contribute to cutting-edge projects.

TECHNICAL SKILLS

Programming: Java, Python, C/C++, SQL, JavaScript
Frameworks: React.js, Spring Boot, Express.js, Node.js, React Native
AI/ML: Natural Language Processing, Large Language Models, Groq AI, Machine Learning Pipelines
Data: MongoDB, MySQL, Analytics Dashboards, Query Optimization
Cloud: AWS (EC2, S3, Lambda), Git, CI/CD Pipelines, Swagger UI
Other: REST APIs, Microservices, JWT Security, JUnit, Mockito, IoT

PROFESSIONAL EXPERIENCE

Software Development Engineer Intern
Amazon

May 2025
Remote

- Architected WebView-based in-app purchase system using Java and Amazon IAP SDK, serving 1000+ internal testers and boosting transaction stability by 18%
- Designed end-to-end payment workflow (initialization, validation, confirmation), slashing purchase failures by 12% through robust error handling
- Diagnosed and resolved 40+ edge cases across multiple device types, cutting application crashes by 22%
- Refactored codebase by removing 30+ obsolete configurations, accelerating maintenance efficiency by 15%
- Partnered with QA team on 60+ regression scenarios, achieving zero critical bugs in production release

Technical Lead

Dec 2024
India

Smart India Hackathon – National Finalist

- Spearheaded 6-member team building AI-powered Learning Management System using React, Node.js, and ML algorithms for 500+ concurrent students
- Engineered NLP chatbot achieving 85% intent accuracy and 30% query resolution improvement over baseline
- Constructed real-time analytics dashboard with MongoDB aggregation, reducing data fetch time by 40%

KEY PROJECTS

AI Interview Assistant Platform | *React, Express, MongoDB, LLMs*

2024

- Launched full-stack mock interview system serving 200+ users; integrated LLM for contextual feedback generation
- Trained ML-based ATS resume parser extracting skills and experience with 92% accuracy across 300+ documents
- Optimized database indexes and caching layer, shrinking API response latency by 35%

Paws & Care – Pet Services Platform | *React.js, REST APIs*

2024

- Delivered real-time booking engine for pet caretakers, onboarding 100+ beta users and processing 200+ reservations
- Streamlined data fetching logic, trimming UI load time by 1.5 seconds and raising user engagement by 25%

Enterprise News Portal | *Spring Boot, MySQL, JWT Authentication*

2023

- Created microservices backend handling 500+ daily readers with JWT-secured endpoints and role-based access
- Tuned SQL queries and indexing strategy, enhancing article retrieval speed by 40%

Intelligent Customer Support Bot | *Python, NLP, Machine Learning*

2023

- Deployed conversational AI achieving 85-90% intent classification accuracy with sub-1.2 second response times
- Automated 30-40% of support queries by training model on 1000+ historical customer interactions

LEADERSHIP & RECOGNITION

Smart India Hackathon 2024: National Finalist among 10,000+ participating teams

Technical Workshop Instructor: Led Python NLP chatbot development session for 50+ students at Sri Eshwar College (2025)

Research Presentation: Presented IoT-based Women Safety Smartwatch with GPS accuracy under 5m at Kongu College Symposium (2025)

Competitive Programming: Solved 200+ data structures and algorithms problems across multiple platforms

Availability: Ready for 8+ week internship commitment; willing to relocate to India
