PROFILE

B.Tech Information Technology Student (2027) with experience as an Amazon SDE Intern (2025). Strong foundation in software development, SDLC, and data structures and algorithms. Skilled in building full-stack applications and AI-powered systems using Java, Python, React, and Spring Boot. Experienced in development, debugging, testing, and collaborative engineering environments.

TECHNICAL SKILLS

Programming: Java, Python, C++, JavaScript, SQL

Frontend: React.js, HTML, CSS

Backend: Spring Boot, Express.js, REST APIs

Databases: MySQL, MongoDB

Tools & Cloud: AWS, Git, Postman, Swagger, Software Testing

AI / ML: LangChain, RAG Systems, LLM Applications, NLP, Prompt Engineering, Model Evaluation

Core CS: Data Structures & Algorithms, OOP, DBMS, OS, CN, SDLC

EXPERIENCE

Software Development Engineer Intern — Amazon

2025

- Contributed to development of Java-based application modules supporting core system functionality.
- Built a WebView-based purchase system with secure transaction validation, improving transaction reliability.
- Designed and executed 15+ unit and integration test cases, strengthening code quality.
- Assisted in debugging issues and resolving defects, improving application stability.
- Supported deployment processes and collaborated with team members in an Agile environment.
- Contributed to development and enhancement of product features and system components.

PROJECTS

Paws & Care — Pet Service Booking Platform

React.js, JavaScript, REST APIs

- Developed a platform connecting users with nearby pet caretakers.
- Implemented search functionality, booking system, and responsive UI, enhancing user experience.
- Worked on dynamic data handling and component-based frontend design.

Online News Portal — Backend Application

Spring Boot, MySQL

- Built REST APIs with authentication support, ensuring secure data access.
- Designed database structure and worked on query optimization.
- Followed SDLC practices including testing and debugging.

AI Healthcare Awareness Chatbot

Python, NLP, LangChain, RAG

- Developed a chatbot for healthcare awareness using NLP techniques.
- Integrated retrieval-based approach to improve response relevance and consistency.
- Applied prompt engineering techniques to enhance output quality.

EDUCATION

B.Tech – Information Technology

2023 – 2027

Sri Krishna College of Engineering and Technology

Higher Secondary Education

91.3%

St. Thomas Matriculation Higher Secondary School

ACHIEVEMENTS

- Solved 200+ Data Structures and Algorithms problems on LeetCode.
- Participated in Smart India Hackathon.
- Presented research on AI + IoT Women Safety System.
