PROFESSIONAL SUMMARY

Software Engineer with proven experience building scalable payment systems and distributed microservices at Amazon serving 1 million customers. Proficient in Java, Spring Boot, React, AWS, Python, and microservices architecture with expertise in system design and cloud computing. Delivered 30 percent reduction in production defects through test automation and 25 percent improvement in deployment stability via CI/CD pipeline optimization. Strong foundation in data structures, algorithms, and object-oriented programming with 200+ LeetCode problems solved. Experienced in Agile development, code review, and performance optimization.

WORK EXPERIENCE

Software Development Engineer Intern

Amazon

May 2025 – July 2025

Remote

- Developed PCI-DSS compliant payment processing application using Java, Spring Boot, and IAP SDK, handling transaction workflows for 1 million customers across 50+ payment scenarios with 100 percent verification rate
- Reduced production defects by 30 percent by implementing comprehensive automated testing framework with JUnit, Mockito, and Selenium covering 15+ test cases including edge cases, security vulnerabilities, and API integrations
- Improved deployment stability by 25 percent and decreased build time by 15 percent by modernizing CI/CD pipelines using Jenkins, Maven, and Docker while deprecating legacy WebLab infrastructure
- Decreased debugging time by 40 percent by implementing structured CloudWatch logging with real-time monitoring dashboards, performance metrics tracking, and alerting mechanisms in AWS
- Conducted 20+ code reviews for Spring Boot microservices following Agile methodology and Scrum practices, ensuring best practices for scalability, maintainability, security, and system design patterns
- Collaborated with cross-functional teams including product managers, QA engineers, and security teams to deliver high-quality software solutions on schedule

PROJECTS

Online News Portal

December 2024

Technologies: Spring Boot, React, MySQL, JWT, AWS EC2, Redis, REST API

- Architected distributed microservices backend supporting 100+ concurrent users with sub-200ms API response time using database indexing optimization, query tuning, and Redis caching layer
- Implemented JWT authentication and role-based access control (RBAC) securing RESTful APIs with 99.9 percent uptime using AWS EC2 auto-scaling groups, Elastic Load Balancing, and CloudWatch monitoring
- Designed normalized relational database schema in MySQL with proper indexing strategies and implemented Spring Data JPA repositories for efficient data access and ORM mapping

Pet Care Platform

November 2024

Technologies: React, Redux Toolkit, Node.js, Express, MongoDB, JavaScript

- Built responsive single-page application achieving 95+ Google Lighthouse performance score and sub-2 second load time using code splitting, lazy loading, tree shaking, and performance optimization techniques
- Developed scalable RESTful APIs with 50+ endpoints implementing comprehensive input validation, error handling middleware, structured logging, and HTTP status codes, reducing API errors by 60 percent
- Implemented state management using Redux Toolkit with normalized data structures and optimized React component rendering using memoization and virtual DOM optimization

AI Customer Support System

January 2025

Technologies: Python, NLP, Machine Learning, scikit-learn, Natural Language Processing

- Automated 70 percent of customer queries using natural language processing and supervised machine learning algorithms including Naive Bayes, Support Vector Machines, and decision trees, achieving 85 percent intent classification accuracy
- Performed feature engineering, data preprocessing, model training, hyperparameter tuning, and cross-validation to optimize model performance and reduce false positives

EDUCATION

Bachelor of Technology in Information Technology

Sri Krishna College of Engineering and Technology

June 2023 – July 2027

Tamil Nadu, India

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks and Libraries: Spring Boot, Spring Framework, Spring Security, Spring Data JPA, Hibernate, React, Redux, Node.js, Express, JUnit, Mockito

Databases: MySQL, PostgreSQL, MongoDB, Redis, JDBC, Database Design, SQL Optimization

Cloud and DevOps: Amazon Web Services (AWS), EC2, S3, RDS, Lambda, CloudWatch, Docker, Kubernetes, Jenkins, Git, GitHub, Maven, CI/CD Pipelines

Development Tools: IntelliJ IDEA, Visual Studio Code, Postman, Swagger, Jira, Confluence, Selenium, Git, Linux

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming (OOP), System Design, Microservices Architecture, RESTful APIs, Agile Methodology, Scrum, Test-Driven Development (TDD), Design Patterns, Scalability, Performance Optimization, Software Development Life Cycle (SDLC), Code Review

CERTIFICATIONS AND ACHIEVEMENTS

-
- AWS Certified Developer Associate – Infosys TECHA (2024)
 - Spring Data JPA with Spring Boot Certification – Infosys Springboard (2024)
 - SQL Advanced Certificate – HackerRank (2024)
 - Solved 200+ Data Structures and Algorithms Problems – LeetCode (2024)
 - Smart India Hackathon 2024 – Top 10 Finalist at College Level (2024)
